TO WHOMSOEVER IT MAY CONCERN

Volkswagen has established a car manufacturing facility in India. In line with our ISO 14001 (EMS) initiatives, we have installed the Green Box from Green Elephant Engineering Private Limited to process all our canteen waste inside our plant premises.

We are highly satisfied with their performance and have extended the annual maintenance contract to them since last four years.

Green Box is very critical to our catering operations at Plant. Green Elephant Company is taking care of operating the same in terms of processing the daily wet waste from Kitchen. Their services are available to us with help of dedicated resource deployed at site on daily basis

They also keep the level of Bacteria in control inside the Green Box on regular intervals. The manure generated in this process is used in our gardens.
